

We
move
mountains

Ciao,
I am **Andrea Condotta** and
today I will speak as

Gruber Logistics as PA and Innovation Director

ALICE as Vice Chair

The same commitment since 1936

GRUBER Logistics Family Board: Michael, Martin and Christian Gruber

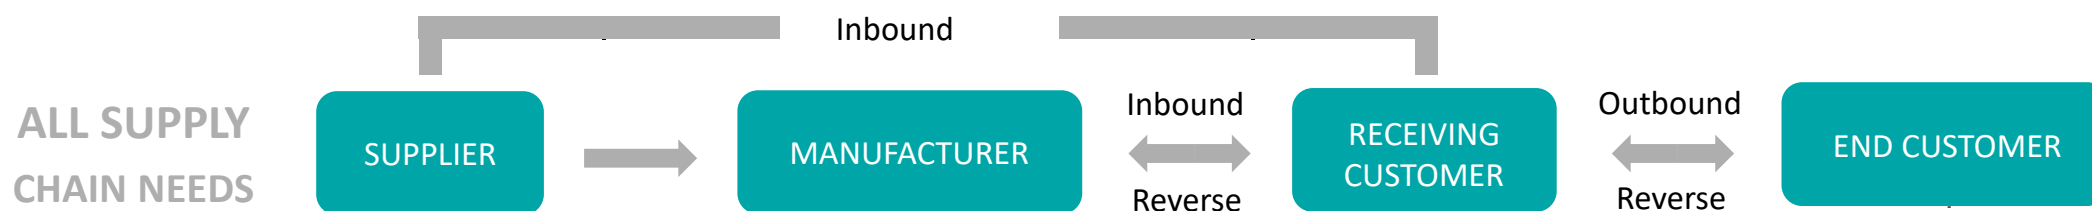

GRUBER Logistics Managing Directors:
Marcello Corazzola, Martin Gruber, Marco Manfredini

A story of new challenges and improvements

From a simple transport provider to a digital transport & logistics company

SERVICE INTEGRATION

CONTROL TOWER

A full and integrated range of services to cover all supply chain needs

LOX

LOGISTICS SERVICES

FTL

FULL TRUCK & INTERMODALITY

LTL

LESS THAN TRUCKLOAD

XTL

HEAVY & SPECIAL TRANSPORTS

PAO

PROJECT CARGO, AIR & OCEAN

RAL

RELOCATION & ASSEMBLY

The logo graphic consists of two concentric circular arcs, one blue and one orange, with a solid orange circle at the top right intersection. The word 'alice' is written in a dark blue, lowercase, sans-serif font, positioned to the left of the arcs.

alice

Alliance for Logistics
Innovation through
Collaboration in Europe

ALICE is an association of leading logistics innovation companies.

ALICE gathers over 190 members and over 700 experts from companies, research organisations, and public bodies across Europe. Members engage in thematic groups, contribute and participate in EU projects, and co-develop strategic roadmaps.

We connect companies, research centres, and policymakers to develop innovations for zero-emission, automated, efficient, agile, resilient and circular supply chains inspired by the Physical Internet.

ALICE gathers over 190 members and over 700 experts from companies, research organisations, and public bodies across Europe. Members engage in thematic groups, contribute and participate in EU projects, and co-develop strategic roadmaps.

Focus areas

5 THEMATIC GROUPS (TGs)

TG1. Efficient and Low Emissions Assets and Energy

TG2. Corridors, hubs and Synchromodality

TG3. Systems and Technologies for Interconnected Logistics

TG4. Supply Network Coordination and Collaboration

TG5. Urban Logistics

With ALICE our members:

Influence EU funding & policy

Shape Horizon Europe priorities & logistics policy

Connect with 700+ experts

Industry, academia & public authorities

Access 150+ R&I projects

Solutions for Physical Internet, data exchange, Digital Twins & more

Achieve sustainability goals

Collaborate on solutions for carbon neutrality

ALICE membership bringing an holistic approach → All key logistics stakeholders represented!

[illegible]

Increasing trends

Sustainability

Sustainability

Gruber Logistics promotes an holistic approach of sustainability integrating environmental, social and ethical aspects.

Sustainability is a cornerstone pillar for our development and directly included in our strategic framework.

Sustainability pillars

Environmental standards relate to the businesses' impact on the environment.

Environmental

Governance

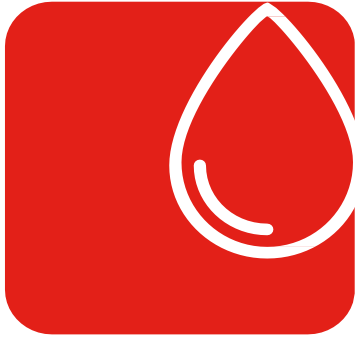

Governance standards concern practices and procedures to ensure fair and transparent management

Social standards deal with our impact on society.

Social

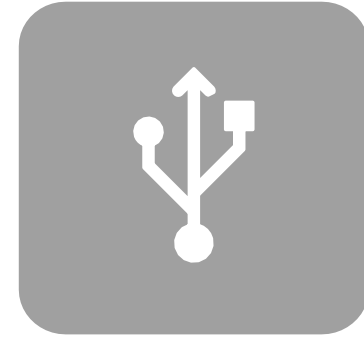

Environmental sustainability

ALTERNATIVE FUELS

INTERMODALITY

**NETWORK AND CARGO
OPTIMISATION**

Digitalization

Strategic framework

- **Digital Cooperation & Data sharing**
- Paperless Transport
- Automation & Artificial intelligence
- Cyber security

There is a growing need within the logistics companies and who work in the logistics to share data to make the logistics chain seamless and faster.

e.g. Intermodality

Strategic framework

- Digital Cooperation & Data sharing
- **Paperless Transport**
- Automation & Artificial intelligence
- Cyber security

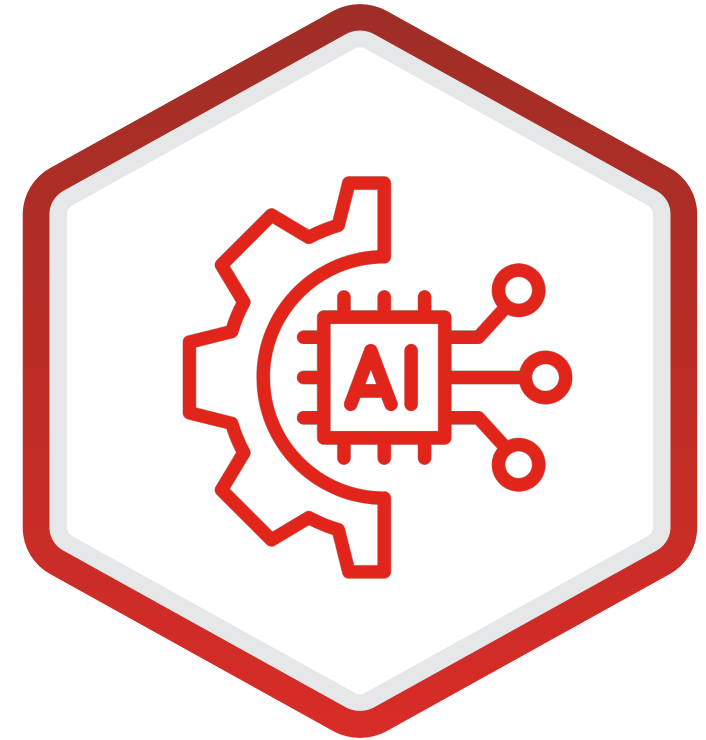

The sector is fully committed in creating a digital documents exchange cooperative system.

e.g. eCMR

Strategic framework

- Digital Cooperation & Data sharing
- Paperless Transport
- **Automation & Artificial intelligence**
- Cyber security

Processes improvement through the application of AI to support decision-making.

The process towards autonomous vehicles is proceeding also in the framework of logistics especially in easy and redundant context of application.

E.g. Automatic dispatching

Strategic framework

- Digital Cooperation & Data sharing
- Paperless Transport
- Automation & Artificial intelligence
- **Cyber security**

The increase in data exchange between companies, in the face of rising geopolitical tensions, exposes businesses to greater risks of cyberattacks. As a result, there is a growing need for practices and technologies to defend against them.

Potential downstream applications in Logistics

- Road congestion analysis
- Monitoring of congestions in logistics hub
- Leakage in fuel supply chain
- Monitoring of electric vehicle and infrastructure warming due to joule effect
- Avoiding distortion of GPS signals
- Support management of yard management systems

Thanks for your attention

Our values. Our guide.
