

**→ FUNDING & SUPPORT OF
SPACE-ENABLED SERVICES FOR
BIG DATA IN HEALTH**

Funding up to € 60 000 per Activity
Deadline 13 November 2018

BIG DATA IN HEALTH KICK-START

The demand for healthcare services is increasing. Europeans now live longer but growth in healthcare services is minimal, workforces concentrate in urban areas.

Healthcare services need big data and analytics solutions to provide effective healthcare to an increasing population and the rural demographic. New and innovative commercial solutions utilising the capabilities of satellite navigation, communications and observation, as well as human spaceflight technology, can help to support areas such as biotechnology and healthcare.

The European Space Agency offers support to companies for business case assessment and the development of new space-enabled big data health services.

WHAT WE OFFER

Zero-Equity Funding
up to €60K per Activity

Access to our
Network & Partners

Technical & Commercial
Guidance

Brand Credibility

WHAT WE LOOK FOR

- ✓ Motivated teams with business and domain expertise
- ✓ Attractive market opportunities and customer engagement
- ✓ Commercially viable service concepts
- ✓ Technically feasible solutions enabled by Space

Apply Now!
