

→ PREPARADENESS AND RESPONSE TO NATURAL DISASTERS

Funding up to €64K per Activity
Deadline: 18th June 2020

→ PREPARADENESS AND RESPONSE TO NATURAL DISASTERS

The European Space Agency offers support to companies for business case assessment and development of space enabled services to improve the preparedness (i.e. planning how to respond to a natural disaster) and/or to make response (i.e. efforts to minimize the hazards created by a natural disaster) more effective. Any kind of natural disaster is eligible for this opportunity such as a flood, earthquake or drought. Man-made disasters-such as oil spills or environmental crimes-are *not* the subject of this call.

→ WHAT WE LOOK FOR

- ✓ Motivated teams with business and domain expertise
- ✓ Attractive market opportunities and customer engagement
- ✓ Commercially viable service concepts
- ✓ Technically feasible solutions enabled by space

→ APPLICATION AREAS

Targeted services vary according to the type of natural disasters. They include (but not limited too) management of water resources, risk assessment and damage assessment. Such services need: meteorological information, high resolution maps and imagery, accurate positioning for location based services and robust and global communication. Earth observation, satellite navigation and satellite communication enable these capabilities.
