**→ FUNDING & SUPPORT FOR
SPACE-ENABLED SERVICES IN
THE PULP & PAPER INDUSTRY**

Funding up to € 60 000 per Activity
Deadline 01 October 2018

PULP AND PAPER KICK START

Pulp extracted from wood, fibre crops or waste paper is one of the most abundant raw materials worldwide. Products like cardboard, tissues, even textile, diapers and paper are made from pulp. Space technologies can support the value chain of pulp and paper production starting with sourcing of the raw material. Services to support pulp logistics, paper forest management but also monitoring of environmental conditions can benefit from using space assets, such as satellite communication, satellite navigation or earth observation.

The European Space Agency offers support to companies for business case assessment and development of space-enabled services focused on support of Pulp and Paper industry and associated activities.

WHAT WE OFFER

Zero-Equity Funding
up to €60K per Activity

Access to our
Network & Partners
