

SPACE FOR URBAN GREEN

Funding up to €200K per Activity
Deadline: 11 November 2021

SPACE FOR URBAN GREEN

The European Space Agency (ESA) is offering technical support and funding to companies developing innovative services and solutions which aim to plan, identify, develop, monitor, and maintain urban green spaces. These services and solutions will help cities to become more resilient, so they are able to mitigate the effects of climate change, improve air quality in the urban surroundings and preserve the greenery as natural capital to maximise benefits for all living beings.

With this new opportunity, in collaboration with European cities, ESA aims to support the development of innovative space-based applications which could contribute to the integration of green spaces into smart city planning and urban green management.

The following scenarios have been identified as key focus areas:

- Design and planning of urban green spaces
- Management of urban green spaces
- Urban green impact indicators

WHAT WE OFFER

Zero-Equity Funding
up to €200K per Activity
