Business Applications: space-enabled services

What can BASS offer to companies?

ESA UNCLASSIFIED – For ESA Official Use Only

Your Business Powered by Space:

Zero-equity funding (from €50k to €2M+ per activity)

A personalised ESA consultant

Technical support and commercial guidance

Tailored project management support

Access to our international network of ESA and partners

Access to our network of investors

Credibility of the ESA brand

→ THE EUROPEAN SPACE AGENCY

What's in it for us?

SOCIO-ECONOMIC IMPACT

Deliver social value and economic sustainability

USE OF SPACE TECHNOLOGY

Expand the utilization of space in new markets and user communities

INDUSTRY COMPETITIVENESS

Strengthen European Industry competitiveness on the global space and non-space markets

ESA UNCLASSIFIED – For ESA Official Use Only

Sustainable applications with green impact

It is estimated that abandoning the current high-carbon pathway in favour of a low-carbon future will bring €26 trillion in economic benefit.

Investment in BASS Green Activities since 2010

Market demand for green solutions, new ESA BASS funding opportunities, and collaborations with industry partners will support future growth in sustainable development investment

With **€183M** invested into

€11 6% 22% €40 22% €4 2% €3 2% €34 19% €39 22% **300 ideas** the green transition now drives 48% of all new ESA Space Solutions.

ESA UNCLASSIFIED - For ESA Official Use Only

Space for Bioeconomy Task Force

The focus of the Task Force is to unite interdisciplinary perspectives to generate a knowledge base for a new, sustainable bioeconomy, and to demonstrate the commercial perspectives of using natural and biological resources to produce energy, food, animal feed, and expensive chemicals.

(二

Promoting the development and demonstration of sustainable innovative space-based technologies and applications addressing the sustainable and circular practices in the bioeconomy supporting the growth of a sustainable green economy;

Objectives

Increase the **impact of the space-based applications** developed through ESA programmes, thanks to the support of the sector stakeholders and financial actors

The Task Force Members will identify key topics based on priorities.

Introduction: textile industry

- Fourth highest pressure category in EU for use of primary raw materials and water (food, housing and transport)
- Fifth in GHG emissions
- Textile value chains: long, globalized and diverse
- Cotton industry:
 - Employs 2% of world's population
 - Water demanding
 - Considerable use of pesticides/ fertilizers
- Better cotton practices:
 - organic & regenerative
 - Mitigating environmental impact
 - Provide traceability
- Aim of the call: increase transparency, sustainability and resilience of the cotton value chain and the textile industry in general with the use of space assets.

Areas of applications

Discussions have been undertaken with relevant stakeholders to identify the following areas of applications:

- Baseline (historical views) on basins: to restore nature & freshwater
- Impacts on water quality
- Assessing environmental impacts of different cotton sustainability practices
- Traceability issues
- Monitoring ecosystem cumulative impact
- Analysing ecosystem services
- Identification of areas for ecosystem restoration or conservation
- Sustainable textile supply chain

Value-added from space

SatEO: geospatial, environmental, weather & mapping information to evaluate "whatif" situations and help in decision-making. SatEO data could also be used for monitoring of natural environment impacts and assess where restoration is feasible.

SatNav: Provide geo-tagging services for data collected by IoT. IoT sensors can be used for example to measure quantity of pollutants in the air. SatNav can then pinpoint the location where the pollution is generated.

SatCom : Communication with users in remote locations without terrestrial network.

Greener Cotton

Greener Cotton leverages satellite data and GIS technology to improve and support sustainable cotton production

It consists of the following services:

- Prevent identity fraud: Data Validation Service 0
- Production monitoring: 0
 - Crop performance monitoring 0
 - Yield assessment
- Supporting sustainable farming: 0
 - Agronomical weather and forecast 0
 - Water use efficiency service and irrigation advisory 0
 - Disease and pest risk management
 - Land responsibility 0

Targeted Users: Extension services, Ginneries, • Traceability platforms and auditors Greener Cotton | ESA Space Solutions

Perspectives on Textile Traceability

Jeffrey Thimm

22 January 2025 www.global-standard.org

GOTS – THE GLOBAL ORGANIC TEXTILE STANDARD

Our vision is that organic textiles will become a significant part of everyday life, enhancing people's lives and the environment.

GOTS is the premier processing standard for textiles made from organic fibers

- Internationally recognised
- Independent third-party certification
- Verifiable, Identifiable and Traceable
- Environmental & Social Criteria
- Covers entire supply chain "from field to fashion"

A Holistic Approach to Sustainability in Textile Production

Traceability throughout the Value Chain

That's Organic - Worldwide.

Cotton Cultivation Remote Assessment CoCuRA

Cotton Cultivation Remote Assessment

2024 Results

- ➢ 6000+ crop fields visited for data collection
- > 2.7 million km² analysed
- Cotton Field Identification: ~ 97% accuracy
- Organic Cotton Differentiation: ~ 80% accuracy

Organic Agriculture Claims can be dependably Monitored Remotely

ORGANIC FIBRES IN GOTS GOODS

NEEDS: advanced traceability for textile fibres (remote sensing)

- ✓ GOTS: region of origin & organic agriculture (documentation)
- > New Impact Categories (field-level data):
 - Social agriculture as livelihood intercropping for food security
 Land Use deforestation / biodiversity / habitat
 Water rainwater infiltration / irrigation
 Animal Welfare stocking density / rotational grazing
 Climate carbon sequestration / GHG flux

How to Apply

ESA UNCLASSIFIED – For ESA Official Use Only

Space for Sustainable Textile Industry: About the Feasibility Study

Winner(s) of the competition will run a 9-month study to investigate the technical feasibility and commercial viability of their idea.

Parallel contracts are possible

ESA will provide funding at 80% for a maximum of €200K to each winning team.

After the study there is the opportunity for further funding and support from ESA.

Visit: Space for a Sustainable Textile Industry
