OBJECTIVES OF THE HYLAS 1 APPLICATIONS INITIATIVE

A World Online...no exceptions

- Avanti's ambition is to deliver a World online, with no exceptions.
- Using the latest satellite broadband technology, Avanti provides affordable satellite broadband and high speed data connectivity through its partner network.
- Our partners use satellite broadband to serve homes, businesses, schools and government offices that could not previously benefit from high-speed internet services.
- Our connectivity supports SCADA, content delivery and other specialist applications to any hard-to-reach area within our satellite's footprint.
- Avanti is growing its satellite fleet, HYLAS 2 launches in H1 next year.

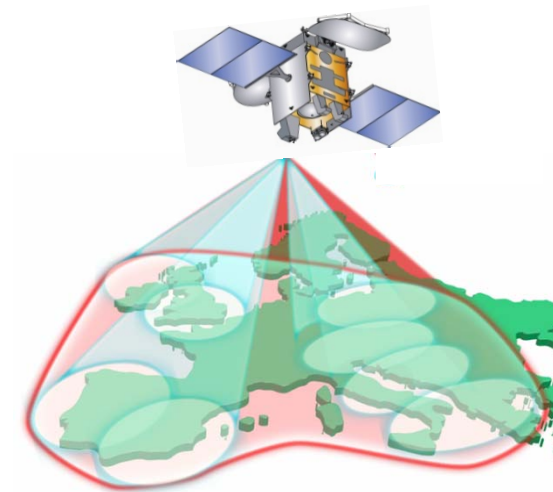

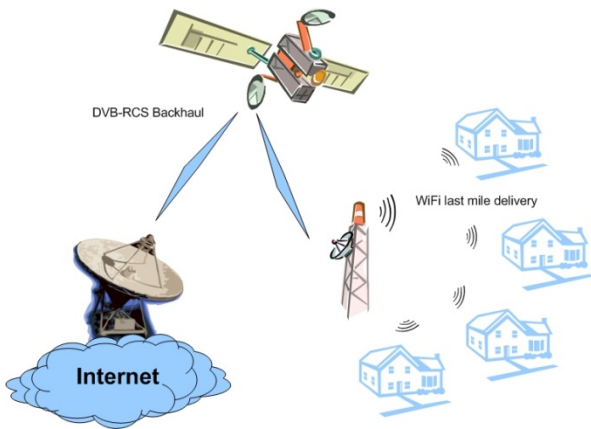

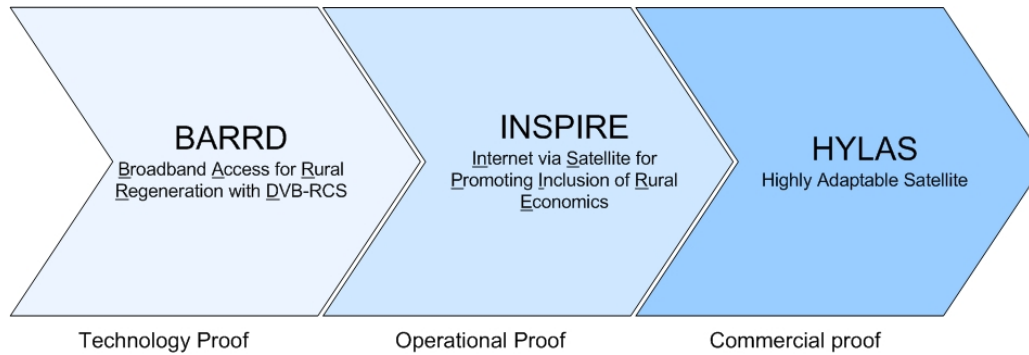

Objectives of the HYLAS 1 Applications Initiative

Avanti's main objectives for the HYLAS 1 Applications initiative are to:

- Stimulate the development of new services and applications;
- Explore the issues and advantages of Ka-band spot beam communications;
- Understand the service requirements of new users;
- Enhance services for existing users;
- Demonstrate the benefits of the flexibility of HYLAS 1;
- Encourage and support partners in establishing profitable businesses!!
