FUNDING & SUPPORT FOR CLEAN AND SAFE MANAGEMENT OF PIPELINES: WATER, HYDROCARBONS AND ELECTRICITY

Funding up to €200K per Activity
Opens: 02/09/19 – Closes 04/11/19
The European Space Agency is offering technical support and funding to companies developing innovative products and services that:

- address the planning, management and impact assessment of the installations (such as pipelines) transporting hydrocarbons and other natural resources such as water and electricity,
- aim at ensuring personal safety, environmental sustainability, long-term economic growth and/or water security,
- benefit from one or more space assets (including Satnav, Satcom, EO, Human Space Flight Technologies). The space assets shall represent a clear added value for the considered services and do not need to be limited to ESA’s or European Space assets.

The following scenarios have been identified as key focus areas:

- Discovering underground resources.
- Pipeline development planning (water, hydrocarbons and electricity).
- Monitoring pipelines infrastructure.
- Detecting leakages.

**WHAT WE OFFER**

- Zero-Equity Funding up to €200K per Activity
- Access to our Network & Partners
- Technical & Commercial Guidance
- Brand Credibility

**WHAT WE LOOK FOR**

- Motivated teams with business and domain expertise
- Attractive market opportunities and customer engagement
- Commercially viable service concepts
- Technically feasible solutions enabled by Space
