What happens when you multiply
the potential of space technology with
ocean industry and aquaculture?

Ocean × Space

CONFERENCE & EXHIBITION
22ND - 24TH MAY 2018 | STAVANGER, NORWAY

SPACEPORT
NORWAY

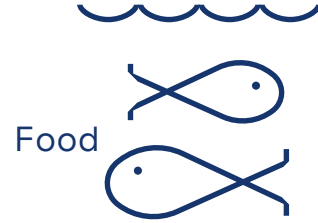

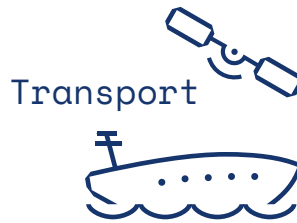

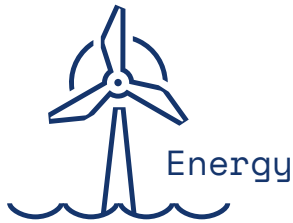

Norsk Romsenter
NORWEGIAN SPACE CENTRE

produced by

CONVENTOR

Your business - powered by space.

Ocean x Space is an event jointly organised by the European Space Agency (ESA), the Norwegian Space Centre and Spaceport Norway, to promote space-enabled services with a focus on maritime business applications. More than 40 world class speakers will focus on new opportunities in the **energy, transport and food** sector, enabled and powered by technology, infrastructure and data from space, for two days on the beautiful west coast of Norway.

YOU WILL LEARN ABOUT:

- Data driven operations
- Autonomous shipping
- Aquaculture innovation
- Sustainable Development
- New communication tech
- Machine learning and IoT
- Industrial digitalisation and a lot more!

YOU WILL MEET:

- European Space Agency
- Norwegian Space Centre
- UNOOSA
- NASA JPL
- Statoil
- SINTEF
- Kongsberg Seatex and many more!

Learn about challenges, opportunities and successful space-enabled services in the maritime sector.

Get inspired by demonstrations of successful maritime services enabled by space.

Learn about opportunities to fund and support your business ideas and discuss the possibilities with relevant stakeholders.

Meet business and technical experts, entrepreneurs, decision makers and investors.

Meet winners of ESA BAs Business Idea Competition, exploring benefits from satellite navigation, Earth observation, satellite communication or other space assets.
